That is why I use Photoshop, not because it's cheap."—Terry White, Big Eye Productions "I think that Photoshop is very good because it's like Word, Excel, and PowerPoint. It's really good for customizing a lot of different graphics. It's not the most beginner-friendly, but it's one of the most powerful programs in the world. I mean, it's not super expensive—there are cheaper products out there that have the same features that are certainly more beginner-friendly, but, you know, if you're willing to put the time and effort into the tools, you can do some really cool stuff."—Jason A. Bell, Cool Graphic Masters "It's a pretty powerful program. It has tons of different features. One of the things that people don't really understand about digital art programs is that Photoshop is powerful enough to make your art."—Brandon Bird, Shutterstock "Photoshop is the most powerful image manipulation program available. For commercial works it's essential. All the great designers use it; it's a definite must."—Jane Shepard, Marvel Comics "Adobe Photoshop CS5 is the program I use for almost everything. I definitely recommend it for anyone with a Mac or PC. It has the best color engine of any photo editor."—Jeffrey Gerstein, Fluid Motion Media
