Damn, my laptop froze! Then I realized that I forgot to close my external hard drive. Pressing the power button again (twice) and holding the "Sleep" button for 10 seconds finally did the trick. If you are in a relationship, or you are already in one, you're likely to have seen (and even perhaps been) a eHarmony advertisement on TV, in print, or on the internet. I've seen a few online dating sites and so far, eHarmony is the best and I actually own part of it. You know the basics about eHarmony. In fact, you may have a profile up on there (if so, please rate my app), or, maybe you've met somebody. If so, you would have probably noticed that you are not able to view their profile and they are not able to view yours. For that you need to sign up for a subscription.
