The shooting happened in the area of South 21st and West Walnut streets. An 18-year-old man was treated at Meadville Hospital and released. The shooting is under investigation. Police ask anyone with information to call them at 724-790-7800. Perry Post has details. Downtown Meadville business owners want gun owners to be aware of their rights in the wake of a gun crime that took place downtown Thursday night. Owner of ABC's Auto Salon John Zelezny said he noticed three men wearing hoodies carrying what appeared to be pump shotguns around the downtown area Thursday night around 10 p.m. "We're aware that there's a pretty high concentration of gun users, there's a pretty high

What's New In?

Active Directory Explorer is a dedicated viewer for Active Directory users. With its help, you can browse AD databases and run searches within the database. The tool features a navigation bar to help you browse the database, and multiple tabs to display object attributes, security permissions and the schema it belongs to. The application is highly configurable, supporting a set of different tabs and parameters for entering data, and it can be saved for reuse. An easy to use interface and a clean layout are also main features. ----- ADEXplorer Information: Comprehensive viewer for Active Directory, allowing you to browse AD databases from a single window. Allows you to view and edit data without opening secondary windows or dialog boxes. Have an intuitive interface with one navigation bar and one tab for the different view features that can be selected. Allows you to change access permissions on object and attribute level. And everything is configurable. Can also take snapshots of the entire database for offline viewing and analysis. ----- ADEXplorer Limitations: ----- ADEXplorer Requirements: ----- Play Store Description: Active Directory Explorer is a viewer for Active Directory, enabling you to browse databases and run searches within the database. The tool features a navigation bar, allowing you to browse the database, and multiple tabs, displaying object attributes, security permissions and the schema it belongs to. The application is highly configurable and supports a set of different tabs and parameters for entering data. Access control is also supported through several levels. • Allows you to compare different snapshots of the same database to highlight all the differences. • The plugin is highly configurable. You can specify any object or attribute as the target and, if required, change the permissions on object and attribute level. • You can configure which tabs can be selected in the View options. • Snapshots of the database can be created and examined, either offline or in the background. • You can specify a time interval at which the snapshots are created. • The Active Directory Explorer functionality can be used by itself, or integrated within third-party applications. • Windows 7 and Windows 8 are supported. ----- Play Store Product Information: The Active Directory Explorer plugin offers an intuitive and extensive interface and a set of configuration options, allowing you to browse Active Directory databases from a single interface. The tool provides a navigation bar to help you browse the database, multiple tabs for displaying object attributes, security permissions and the schema it belongs to, and it can be saved
