I just finally got an i3, and I'm having fun playing retro games with it. I spent a few hours on Zelda 1 and 2 of the NES version from about 2 years ago. It's actually a really good game, and I want to play it again in a few hours for this video! (And I recently got a broken NES controller, so I'll probably have to make this video around my broken one.) Check it out, if you enjoyed. Like it? is a prestigious grade of cocoa which comes from the region of Gràcia/Spain, a small region which was the first on the planet to produce cocoa. Gràcia, the name which the company uses, is one of the less common species of cocoa trees, but one of the most popular. This chocolate is characterized by the following features: It is a natural chocolate made of criollo cocoa beans, processed in small batches and matured for 11 months. The finished product is peculiar, because it consists of a broad family of chocolate which varies from a strong to a quite mild flavor, with a light touch of bitterness. Some call it delicioso or even a "Super-Criollo". This is due to the process we use, a chocolate called "The Bridge" (evoca a un Ola a la CIDOC, a drink from the west of the Andes). We do not have the necessary equipment to achieve this process, so it is impossible to create a product which is similar. The exoticness of Amairo chocolate comes in two ways, from its origin and from its comparison to other famous chocolate from the world. Cocoa bean is different from one variety to another. Amairo chocolate is one of the most delicate and rich from the planet. It consists of 40% cocoa bean by weight, the rest of the cocoa mixture is sugar, fats, milk, and lecithin (a natural stabilizer for chocolate). 10 kg of cocoa beans produce around 50 kg (1000g) of chocolate. Amairo Chocolate uses natural cocoa butter from our region and different fats to the ones used in other chocolates (the use of coconut and olive oils). This makes our chocolate easier to digest. Amairo is 4% lower in fat than milk chocolates (8%). This means a more healthy diet. 11 months of maturation (4 months in the Amairo house). This leads us to our next characteristic, Amairo Chocolate is filled with natural cocoa butter. This means that through the cooking process, the cocoa that is born is kept inside of the cocoa cake because of this chocolate has much more oil than any other chocolate, the percentage of oil of Amairo Chocolate is 9% higher than milk chocolate. We have maintained the high percentage of cocoa by weight. At least, the mark in this chamber will remain almost identical. Amairo Chocolate contains 35% cocoa content by weight, being in this way comparable to silver, dark and

The first game from the newly created indie studio Deep Dark Games, *The Forgotten Forest* is a spooky, psychological, action-adventure game. Rebecca arrives at school to see if her missing sister might have returned from the edge of the mysterious forest. The first thing she finds is something quite alarming: bodies with their heads hacked off. As Rebecca explores the school, she meets Sadie, a young girl who is the same age as her, and is also wondering around the school. Sadie knows much more about what is going on than Rebecca, but her memories are fading. Rebecca quickly learns the truth: she and Sadie are in a school located in the middle of a forest. A few years ago, the school was closed, but it still remains closed, with all the students sent home. It seems like the dead have come back to life, and everybody is scared, even Rebecca and Sadie's parents. Suddenly, a mysterious forest begins to open its gates. Rebecca must locate her parents, all the while avoiding the dead. As Rebecca completes her journey, she will unveil many supernatural mysteries that gradually reveal the school's real reason for being abandoned.

Only one week left to Double your gift Western Monarchs are a stunning sight. They are the first to emerge in spring, and only a few remain as they migrate north. A large aggregation may remain for weeks, providing a natural spectacle for bird enthusiasts and photographers. But what is the extent of their network? How do migrating Monarch butterflies exchange genetic material with one another? A new study published in *Ecology* has found that butterflies disperse long distances, but may not cross international borders. A team of researchers from the University of Florida, the Smithsonian Institution, and the University of New Mexico put on thousands of mini-sweaters and sent them into the sky in April. The team tracked the mini-sweaters, which mimic the wing spots of Monarch butterflies, for a month.
