Windows XP, Vista and 7.Q: Pyspark - Combine Output from multiple Spark Jobs I have two Spark jobs, one of which runs fine and another which always fails. I would like to have the output of the second job as an input to the first (refer to screenshot). Possibly, you will tell me to rewrite the second job in a certain way, while I am not really keen on that. A: If the second job fails why you are using saveAsTextFile in your for loop? The only reason you should use saveAsTextFile is if you want to preserve a proper file name and if you are aware that you have multiple Spark jobs running in parallel. Spark does not offer this functionality out of the box. If you would like to do that, I would recommend to use something like hdfs2parquet, haql or parquet2hive. If you know you have a fixed set of data and you want to avoid writing your own custom Spark Coder, try HDFS. You can use DStream to read from your Hadoop data source and convert it into a 2 parquet files or an RDBMS file (hive). Hip hop music The Pop Corn Report Geraldine Ferraro has been a long-time favorite of many African-Americans. Just last week, she spoke out about racial issues in America, including black unemployment, and was reported to be on her way to join Hillary Clinton
