The game has had various localization issues. In Korea, the home of the international popularity of the King of Fighters, the game was first released on May 31, 2004, and it was published by eight major distributors. Those distributors, including FantanX, which is now developing XIII, had issues with marketing the game, which resulted in a string of delays. It was not until September 21, 2004 that they were able to put it out for sale. It was originally released under the title of KOF Spacy. The title would change to KOF NOVA (Nova for short) for the arcade release. Other markets, including Brazil, were also subject to similar production issues. In Brazil, the game was first released on February 24, 2005, but it was a localized version published by Nova Tales. It was the first game to be localized for the market by Nova Tales. But, the company had problems marketing the game due to its multilingual nature. Besides story mode, there are also fighting games like this: single-player arcade-style player-versus-player fighting games. This game is more like one of those than a story-driven one. As the fighting game is based on SNK's King of Fighters game series, the arcade-style menu with its fighting game can be likened to the SNK's Fatal Fury series. And like Fatal Fury (which SNK was originally planning to make), the goal is to punch, kick, and block your opponent. And you don't have to worry about missed shots or getting hit because of the punishing nature of both sides of the coin (literally). If you make a mistake, you will lose a life. Lives and money are the only way to score points in the game, and they are even accumulated as you play. It is that reason the game is so fun, because the game is easy to learn, and its really easy to keep score. Yet there are a lot of street fighters out there, and you'll definitely be able to compare yourself to others. 5ec8ef588b
