I have managed to sort it out to some extent, so its not a big issue at the moment. My question is: can I install the latest updates on cubase Like the 10.5.12. These are appeared as available when I open cubase. Would it have any impact if I install them Is there any possibility that elicencer will block my access to cubase afterwards Thanks! I have tested many old crack version, but the main problem with them was that it usually gets stuck somewhere inside the installation process.
