both telltale games and hbo have already announced that the new game of thrones series will be coming in the spring of 2014. for the game of thrones fans, it's about time we're given some progress on the upcoming spinoff series of this epic show. in terms of box art, telltale games teased one of the characters we'll meet in the show. on a different note, as a fan of the walking dead, i am excited to see the game released at all. on top of that, i'm excited to play the game just because of the fact that the game is running on blizzard's battle.net. i love how they implemented this massive multiplayer online game into the engine. the user interface of the platform is set to be the most polished and user-friendly on the market, kittelsen said. gamers will be able to jump in and out of live streams and interact with other users easily via the console, he said. players should find that the core gameplay will mostly be what they are used to in the existing series. at launch, last mile will include story mode, survival mode, player vs player mode (similar to the walking dead: the world beyond) and a new persistent game mode called "world out of bounds." story mode uses a system that allows players to create their own story missions and story threads, and survivors may choose their role (mercy, security or justice) to determine how they will affect the story. they may also form factions and take on joint roles in this mode. players can battle as a variety of characters, from jim and carol in the merit faction to alpha, the leader of the pure faction. they can also choose to pursue certain goals, including alliances with other characters, or go it alone with survival as the only goal. the player vs player mode is a team deathmatch-style mode with a head-to-head elimination system, and world out of bounds is a survival-oriented mode where players control the walking dead who roam in a 3d environment. 5ec8ef588b
